Opening

The Department of Mathematics invites applications for one

Postdoctoral Position

for two years starting September 1, 2014, or as soon as possible thereafter, in the framework of the SNFS project “**Arrangements: topology and combinatorics**” at the University of Fribourg.

We welcome applications from all areas pertinent to the project, among them combinatorial topology and algebraic combinatorics, with a preference towards researchers with background in algebraic geometry and an interest in its interactions with combinatorics, especially matroid theory.

We offer an attractive salary, a moderate teaching load and a stimulating and friendly working environment, well-connected in the Swiss academic network as well as internationally. Fribourg’s lively and diverse university contributes to the active cultural and social life of the town which, being on the main rail line between Geneva and Zurich, has many other Swiss cities within easy reach.

We invite applications, including CV, publications list, two letters of recommendation and a summary of research interests (ca. 3 pages), **to be submitted electronically by June 1st, 2014, to delucchi.math@gmail.com (SNSF-Prof. Emanuele Delucchi)**.

The decision will be communicated before June 15.
